I. Adler, H. Buchholz, J. Voigt, R. Wittler, K. Schügerl: Bubble Coalescence Behaviour in Biological Media. I. *Hansenula polymorpha* Cultivation Broths 249

A. Einsele, D. Karrer: Design and Characterization of a Completely Filled Stirred Bioreactor 83

M. Moresi, A. Colicchio, F. Sansovini: Optimization of Whey Fermentation in a Jar Fermenter 173

M. Moresi, A. Colicchio, S. Sansovini, E. Sebastiani: Chemical Oxygen Demand Reduction in a Whey Fermentation 261

J. Páca: Induction Effect of P_{O_2} During Continuous Yeast Production From Ethanol in a Multistage Tower Fermentor 93

B. G. Veilleux: Microbial Viability and Steady State Chemostat Culture 165

D. Vollbrecht, M. A. El Nawawy: Restricted Oxygen Supply and Excretion of Metabolites. I. *Pseudomonas* spec. and *Paracoccus denitrificans* 1

Industrial Microbiology

K. J. Brown: A Method for Turbidimetric Measurement of Bacterial Growth in Liquid Cultures and Agar Plug Diffusion Cultures, Using Standard Test Tubes 59

R. Chong, I. S. Maddox, M. R. Johns, A. G. Wagenaar: Hydrolysis of Bile Acid Conjugates by Selected Fungi 317

A. Das: Parasexual Hybridisation and Citric Acid Production by *Aspergillus niger* 117

A. M. Deschamps, G. Mahoudeau, J. M. Lebeault: Fast Degradation of Kraft Lignin by Bacteria 45

J. P. van Dijken, M. Veenhuis: Cytochemical Localization of Glucose Oxidase in Peroxisomes of *Aspergillus niger* 275

V. Dmitriev, A. Tsiomenko, I. Kulaev, B. Fikhte: A Cyto-Biochemical Study of the 'Canal' Formation in the Yeast Cell Wall 211

W. Fabig, J. C. G. Ottow, F. Müller: Failure of Denitrifying Bacteria to Utilize Benzoic Acid Under Anaerobic Conditions With Nitrate as the Only Terminal Electron Acceptor 133

G. Freyssinet, V. Nigon: Growth of *Euglena gracilis* on Whey 295

D. V. Garcia-Martinez, A. Shinmyo, A. Madia, A. L. Demain: Studies on Cellulase Production by *Clostridium thermocellum* 189

M. Hikuma, H. Suzuki, T. Yasuda, J. Karube, S. Suzuki: A Rapid Electrochemical Method for Assimilation Test of Microorganisms 305

T. R. Jack, E. A. Sullivan, J. E. Zajic: Growth Inhibition of *Thiobacillus thiooxidans* by Metals and Reductive Detoxification of Vanadium (V) 21

C. P. Kubicek, O. Zehentgruber, H. El-Kalak, M. Röhr: Regulation of Citric Acid Production by Oxygen: Effect of Dissolved Oxygen Tension on Adenylate Levels and Respiration in *Aspergillus niger* 101

S. Mauersberger, R. N. Matyashova, H.-G. Müller, A. B. Losinov: Influence of the Growth Substrate and the Oxygen Concentration in the Medium on the Cytochrome P-450 Content in *Candida guilliermondii* 285

J. Netrval: Effects of Aeration and of Corn Steep Concentration on L-Asparaginase Production in *Escherichia coli* 185

K. Oteng-Gyang, G. Moulin, P. Galzy: Effect of Medium Composition on Excretion and Biosynthesis of the Amylases of *Schwanniomyces castelli* 129

E. Puhar, L. H. Guerra, I. Lorencez, A. Fiechter: A Combination of Methods for the On-Line Determination of Alcohols in Microbial Cultures 227

M. Raimbault, D. Alazard: Culture Method to Study Fungal Growth in Solid Fermentation 199

W. S. Ramsey, E. D. Nowlan, L. B. Simpson: Resolution of Microbial Mixtures by Free Flow Electrophoresis 217

K. Singh, S. Sun, S. Rakhit: Cephalosporin Acetylesterase Activity of *Fusaria* 15

H. Sočič, V. Gaberc-Porekar: Micromethod for the Quantitative Determination of Succinic Acid in the Fermentation Media 53

G. W. Strandberg: A Cyclic Pattern of Hydrogen Evolution by *Anabaena flos-aquae* 19

A. Tsuchiya, N. Nishio, S. Nagai: Medium Optimization for a Methanol Utilizing Bacterium Based on Chemostat Theory 121

T. G. Villa, H. J. Phaff: Recovery of Invertase and Laminarinases From Industrial Waste Broths of Baker's Yeast 9

F. Zadražil: Influence of Ammonium Nitrate and Organic Supplements on the Yield of *Pleurotus sajor caju* (Fr.) Sing 31

F. Zadražil, H. Brunnert: The Influence of Ammonium Nitrate Supplementation on Degradation and in vitro Digestibility of Straw Colonized by Higher Fungi 37
